# II International Summer School on Grounded Theory and Qualitative Methods

University of Pisa, 5-9 June 2017

The Department of Political Sciences, University of Pisa, invites you to attend the II International Summer School on Grounded Theory and Qualitative Methods, under the support of AIS (Associazione Italiana di Sociologia).

We are pleased to introduce you to the most renowned scholars in the Grounded Theory – Qualitative Research traditions, coming from European Universities, learn and live for some days in a historically rich, stimulating and welcoming town.

It will be a five-day, intensive course mainly devoted to introducing participants to Grounded Theory and Qualitative Methods

with a practical approach and with the aim to giving answer to questions such as “how to do research”, “how to collect, analyse and interpret qualitative data”, “how to write a research report” basing the results on your findings.

Join us at the Summer School and be an active learner in our classes and in our collaborative groups. Meet interesting people you can interact with and discuss topics of your own interest concerning qualitative methods and how to give answer to your daily research problems.

# Teachers

Anne Ryen

*Professor of Sociology at University of Agder (UiA). She has run methods seminars and Ph.D. courses in several Scandinavian and European countries as well as in African countries. She is former coordinator of the ESA research network on qualitative research, and former member of ESA Exec.*

Thaddeus Müller

*Thaddeus Muller is Senior Lecturer at Lancaster University Law School. His research focus is on (urban) youth, such as the labeling of (ethnic) youth hanging around, the consumption of urban nightlife, drugs policy, hooliganism, academic fraud and the social world of music. He's Vice President of SSSI.*

Roberto Cipriani

*Roberto Cipriani is Full Professor of Sociology at Università Roma Tre. He has carried out extensive research both in the theoretical and empirical fields. He has been President of the Italian Association of Sociology, President of the Research Committee of Sociology of Religion within the International Sociological Association as well as Editor-in-Chief of the journal International Sociology. He has been President of the European Council of the National Associations of Sociology.*

Krzysztof Konecki

*Krzysztof Konecki is Chief of Sociology of Organization and Management Department of the University of Lodz, editor-in-chief of Qualitative Sociology Review ([www.qualitativesociologyreview.org](http://www.qualitativesociologyreview.org)), chair of a section of Qualitative Sociology and Symbolic Interactionism of Polish Sociological Association. His main research fields are: methodology of qualitative research, sociology of organization and management, sociology of interactions.*

Michael Dellwing

*Michael Dellwing is a lecturer in the Department of Social Sciences at Kassel University. His fields of research include ethnography, everyday life sociology, deviance and sociology of law, and sociology of psychiatry. Recent publications include: Einführung in die interaktionistische Ethnografie with Robert Prus (Springer, 2012).*

Andrea Salvini

*Andrea Salvini, PhD, is Professor of Methodology of Social Research at the Department of Political Sciences, University of Pisa. His main research interests deal with processes of data analysis, especially in Grounded Theory. In 2010 he organized the first european conference of the Society for the Study of Symbolic Interaction and he is now the President of the EUSSSI Board.*

# What you will learn attending the Summer School

This Summer School focuses on improving your skills in using Grounded Theory strategies to help you increase the incisiveness, clarity, and creativity of your work.

## Research Design

*Build an incisive research design in Grounded Theory, basing on the “constructivist” version. Use “sensitising concept” to guide your research and run theoretical sampling*

## Collect and Analyse

*Using interviews to collect data; collecting and analyzing data; initial coding, memoing, categorizing. Develop and recognize powerful codes; engage in comparative analysis*

## Visualize and Interpret

*Strengthen your emergent conceptual categories; visualize data to support interpretation and comparison; understand theoretical saturation. Use visual grounded theory*

## Theory Building

*Integrate categories into a coherent and compelling theory; write a research report; satisfy quality in qualitative analysis; communicate your findings; deal with CAQDAS to improve your analyses*
